ATLAS

of

reconstructed Late Palaeozoic climate

This Atlas provides the graphics for the PhD thesis “Environmental reconstruction of the Late Palaeozoic; Numeric modelling and geological evidences“.

Marco Roscher
Atlas Figure 1: Permo-Carboniferous palaeoclimate indicators and their temporal relation reproducing a ~8 Ma orbital cycle.................................................................................................................. 15
Atlas Figure 2: Definition of solar climate zones due to the Lauer & Frankenberg climate classification................................................................................................................................. 16
Atlas Figure 3: Distribution of modelled climates on a recent Earth, described by simplified Köppen & Geiger climate classification.................................................................................................................. 17
Atlas Figure 4: Palaeogeography of the Middle Mississippian and the conversion for the numeric model grid.......................................................................................................................... 18
Atlas Figure 5: Palaeotopography of the Middle Mississippian............................................................................................................................................................................................. 19
Atlas Figure 6: Palaeogeography at the mid Carboniferous boundary and the conversion for the numeric model grid .................................................................................................................. 20
Atlas Figure 7: Palaeotopography at the mid Carboniferous boundary.......................................................................................................................................................................................... 21
Atlas Figure 8: Palaeogeography at the Carboniferous Permian boundary and the conversion for the numeric model grid .................................................................................................................. 22
Atlas Figure 9: Palaeotopography at the Carboniferous Permian boundary.......................................................................................................................................................................................... 23
Atlas Figure 10: Palaeogeography of the Early Permian and the conversion for the numeric model grid ................................................................................................................................. 24
Atlas Figure 11: Palaeotopography of the Early Permian............................................................................................................................................................................................. 25
Atlas Figure 12: Palaeogeography of the Middle Permian and the conversion for the numeric model grid ................................................................................................................................. 26
Atlas Figure 13: Palaeotopography of the Middle Permian............................................................................................................................................................................................. 27
Atlas Figure 14: Palaeogeography of the Late Permian and the conversion for the numeric model grid.............................................................................................................................................. 28
Atlas Figure 15: Palaeotopography of the Late Permian ............................................................................................................................................................................................. 29
Atlas Figure 16: Holdridge life zonation diagram ................................................................................................................................................................................................. 30
Atlas Figure 17: Simplified Köppen & Geiger climate classification of the Middle Mississippian and the annual mean wind speed (in m/s) and direction ............................................... 31
Atlas Figure 18: Simplified Lauer & Frankenberg climate classification of the Middle Mississippian and annual mean wind speed (in m/s) and direction .................................. 32
Atlas Figure 19: Regional splitting for the Holdridge life zonation diagram investigations in the Middle Mississippian .......................................................................................... 33
Atlas Figure 20: Holdridge life zonation diagram of the Middle Mississippian ........................................................................................................................................................... 34
Atlas Figure 21: Swamp probability map (colour-coded percentages) and modelled forest cover > 0.75 (dashed line) in the Middle Mississippian ....................................................... 35
Atlas Figure 22: Multi-year annual sum precipitation in mm and annual mean wind speed (in m/s) and direction in the Middle Mississippian ......................................................... 36
Atlas Figure 23: Multi-year seasonal sum precipitation in mm and seasonal mean wind speed (in m/s) and direction for northern winter (DJF) in the Middle Mississippian .... 37
Atlas Figure 24: Multi-year seasonal sum precipitation in mm and seasonal mean wind speed (in m/s) and direction for northern spring (MAM) in the Middle Mississippian .... 38
Atlas Figure 25: Multi-year seasonal sum precipitation in mm and seasonal mean wind speed (in m/s) and direction for northern summer (JJA) in the Middle Mississippian .... 39
Atlas Figure 26: Multi-year seasonal sum precipitation in mm and seasonal mean wind speed (in m/s) and direction for northern autumn (SON) in the Middle Mississippian .... 40
Atlas Figure 27: Multi-year annual mean temperature in °C in the Middle Mississippian ........................................................................................................................................... 41
Atlas Figure 28: Multi-year seasonal mean temperature in °C and seasonal mean wind speed (in m/s) and direction in the Middle Mississippian for the northern winter (DJF) .... 42
Atlas Figure 29: Multi-year seasonal mean temperature in °C and seasonal mean wind speed (in m/s) and direction in the Middle Mississippian for the northern spring (MAM) . 43
Atlas Figure 30: Multi-year seasonal mean temperature in °C and seasonal mean wind speed (in m/s) and direction in the Middle Mississippian for the northern summer (JJA). 44
Atlas Figure 31: Multi-year seasonal mean temperature in °C and seasonal mean wind speed (in m/s) and direction in the Middle Mississippian for the northern autumn (SON). 45
Atlas Figure 32: Multi-year annual mean soil temperature in °C at a depth of 9.3 m in the Middle Mississippian ...................................................................................................... 46
Atlas Figure 33: Multi-year average maximum difference between warmest and coldest month in the Middle Mississippian ................................................................................... 47
Atlas Figure 34: Multi-year annual maximum wind speed in m/s and its direction in the Middle Mississippian ........................................................................................................ 48
Atlas Figure 35: Multi-year seasonal mean vegetation cover in the Middle Mississippian northern winter (DJF) (fract. 1 = fully covered) and forest cover > 0.75 (dashed line) ... 49
Atlas Figure 36: Multi-year seasonal mean vegetation cover in the Middle Mississippian northern spring (MAM) (fract. 1 = fully covered) and forest cover > 0.75 (dashed line) 50
Atlas Figure 37: Multi-year seasonal mean vegetation cover in the Middle Mississippian northern summer (JJA) (fract. 1 = fully covered) and forest cover > 0.75 (dashed line) . 51
Atlas Figure 38: Multi-year seasonal mean vegetation cover in the Middle Mississippian northern autumn (SON) (fract. 1 = fully covered) and forest cover > 0.75 (dashed line) 52
Atlas Figure 39: Multi-year seasonal mean snow height in m in the Middle Mississippian northern winter (DJF) ..................................................................................................... 53
Atlas Figure 40: Multi-year seasonal mean snow height in m in the Middle Mississippian northern spring (MAM) .................................................................................................. 54
Atlas Figure 41: Multi-year seasonal mean snow height in m in the Middle Mississippian northern summer (JJA) .................................................................................................. 55
Atlas Figure 42: Multi-year seasonal mean snow height in m in the Middle Mississippian northern autumn (SON) .................................................................................................. 56
Atlas Figure 43: Multi-year seasonal mean sea-ice thickness in m in the Middle Mississippian northern winter (DJF) ............................................................................................. 57
Atlas Figure 44: Multi-year seasonal mean sea-ice thickness in m in the Middle Mississippian northern spring (MAM) .......................................................................................... 58
Atlas Figure 45: Multi-year seasonal mean sea-ice thickness in m in the Middle Mississippian northern summer (JJA) ........................................................................................... 59
Atlas Figure 46: Multi-year seasonal mean sea-ice thickness in m in the Middle Mississippian northern autumn (SON) .......................................................................................... 60
Atlas Figure 47: Simplified Köppen & Geiger climate classification at the mid Carboniferous boundary and the annual mean wind speed (in m/s) and direction ...................... 61
Atlas Figure 48: Simplified Lauer & Frankenberg climate classification at the mid Carboniferous boundary and annual mean wind speed (in m/s) and direction ...................... 62
Atlas Figure 49: Regional splitting for the Holdridge life zonation diagram investigations at the mid Carboniferous boundary ................................................................................ 63
Atlas Figure 50: Holdridge life zonation diagram at the mid Carboniferous boundary ................................................................................................................................................ 64
Atlas Figure 51: Swamp probability map (colour-coded percentages) and modelled forest cover > 0.75 (dashed line) at the mid Carboniferous boundary ................................. 65
Atlas Figure 52: Multi-year annual sum precipitation in mm and annual mean wind speed (in m/s) and direction at the mid Carboniferous boundary ............................................ 66
Atlas Figure 53: Multi-year seasonal sum precipitation in mm and seasonal mean wind speed (in m/s) and direction for northern winter (DJF) at the mid Carboniferous boundary

Atlas Figure 54: Multi-year seasonal sum precipitation in mm and seasonal mean wind speed (in m/s) and direction for northern spring (MAM) at the mid Carboniferous boundary

Atlas Figure 55: Multi-year seasonal sum precipitation in mm and seasonal mean wind speed (in m/s) and direction for northern summer (JJA) at the mid Carboniferous boundary

Atlas Figure 56: Multi-year seasonal sum precipitation in mm and seasonal mean wind speed (in m/s) and direction for northern autumn (SON) at the mid Carboniferous boundary

Atlas Figure 57: Multi-year annual mean temperature in °C at the mid Carboniferous boundary

Atlas Figure 58: Multi-year seasonal mean temperature in °C and seasonal mean wind speed (in m/s) and direction at the mid Carboniferous boundary for the northern winter (DJF)

Atlas Figure 59: Multi-year seasonal mean temperature in °C and seasonal mean wind speed (in m/s) and direction at the mid Carboniferous boundary for the northern spring (MAM)

Atlas Figure 60: Multi-year seasonal mean temperature in °C and seasonal mean wind speed (in m/s) and direction at the mid Carboniferous boundary for the northern summer (JJA)

Atlas Figure 61: Multi-year seasonal mean temperature in °C and seasonal mean wind speed (in m/s) and direction at the mid Carboniferous boundary for the northern autumn (SON)

Atlas Figure 62: Multi-year annual mean soil temperature in °C at a depth of 9.3 m at the mid Carboniferous boundary

Atlas Figure 63: Multi-year average maximum difference between warmest and coldest month at the mid Carboniferous boundary

Atlas Figure 64: Multi-year annual maximum wind speed in m/s and its direction at the mid Carboniferous boundary
Atlas Figure 80: Holdridge life zonation diagram at the Carboniferous Permian boundary

Atlas Figure 81: Swamp probability map (colour-coded percentages) and modelled forest cover > 0.75 (dashed line) at the Carboniferous Permian boundary

Atlas Figure 82: Multi-year annual sum precipitation in mm and annual mean wind speed (in m/s) and direction at the Carboniferous Permian boundary

Atlas Figure 83: Multi-year seasonal sum precipitation in mm and seasonal mean wind speed (in m/s) and direction for northern winter (DJF) at the Carboniferous Permian boundary

Atlas Figure 84: Multi-year seasonal sum precipitation in mm and seasonal mean wind speed (in m/s) and direction for northern spring (MAM) at the Carboniferous Permian boundary

Atlas Figure 85: Multi-year seasonal sum precipitation in mm and seasonal mean wind speed (in m/s) and direction for northern summer (JJA) at the Carboniferous Permian boundary

Atlas Figure 86: Multi-year seasonal sum precipitation in mm and seasonal mean wind speed (in m/s) and direction for northern autumn (SON) at the Carboniferous Permian boundary

Atlas Figure 87: Multi-year annual mean temperature in °C at the Carboniferous Permian boundary

Atlas Figure 88: Multi-year seasonal mean temperature in °C and seasonal mean wind speed (in m/s) and direction at the Carboniferous Permian boundary for the northern winter (DJF)

Atlas Figure 89: Multi-year seasonal mean temperature in °C and seasonal mean wind speed (in m/s) and direction at the Carboniferous Permian boundary for the northern spring (MAM)

Atlas Figure 90: Multi-year seasonal mean temperature in °C and seasonal mean wind speed (in m/s) and direction at the Carboniferous Permian boundary for the northern summer (JJA)

Atlas Figure 91: Multi-year seasonal mean temperature in °C and seasonal mean wind speed (in m/s) and direction at the Carboniferous Permian boundary for the northern autumn (SON)
Atlas Figure 92: Multi-year annual mean soil temperature in °C at a depth of 9.3 m at the Carboniferous Permian boundary ................................................................. 106

Atlas Figure 93: Multi-year average maximum difference between warmest and coldest month at the Carboniferous Permian boundary ......................................................... 107

Atlas Figure 94: Multi-year annual maximum wind speed in m/s and its direction at the Carboniferous Permian boundary ................................................................. 108

Atlas Figure 95: Multi-year seasonal mean vegetation cover at the Carboniferous Permian boundary northern winter (DJF) (fract. 1 = fully covered) and forest cover > 0.75 (dashed line) ....................................................................................................................................... 109

Atlas Figure 96: Multi-year seasonal mean vegetation cover at the Carboniferous Permian boundary northern spring (MAM) (fract. 1 = fully covered) and forest cover > 0.75 (dashed line) ....................................................................................................................................... 110

Atlas Figure 97: Multi-year seasonal mean vegetation cover at the Carboniferous Permian boundary northern summer (JJA) (fract. 1 = fully covered) and forest cover > 0.75 (dashed line) ....................................................................................................................................... 111

Atlas Figure 98: Multi-year seasonal mean vegetation cover at the Carboniferous Permian boundary northern autumn (SON) (fract. 1 = fully covered) and forest cover > 0.75 (dashed line) ....................................................................................................................................... 112

Atlas Figure 208: Holdridge life zonation diagrams of the Late Palaeozoic in Antarctica, 340 Ma: Middle Mississippian, 320 Ma: mid Carboniferous boundary, 300 Ma: Carboniferous Permian boundary, 290 Ma: Early Permian, 270 Ma: Middle Permian, 250 Ma: Late Permian
Atlas Figure 209: Holdridge life zonation diagrams of the Late Palaeozoic in southern Africa, 340 Ma: Middle Mississippian, 320 Ma: mid Carboniferous boundary, 300 Ma: Carboniferous Permian boundary, 290 Ma: Early Permian, 270 Ma: Middle Permian, 250 Ma: Late Permian
Atlas Figure 210: Holdridge life zonation diagrams of the Late Palaeozoic in northern Africa, 340 Ma: Middle Mississippian, 320 Ma: mid Carboniferous boundary, 300 Ma: Carboniferous Permian boundary, 290 Ma: Early Permian, 270 Ma: Middle Permian, 250 Ma: Late Permian
Atlas Figure 211: Holdridge life zonation diagrams of the Late Palaeozoic in southern South America, 340 Ma: Middle Mississippian, 320 Ma: mid-Carboniferous boundary, 300 Ma: Carboniferous Permian boundary, 290 Ma: Early Permian, 270 Ma: Middle Permian, 250 Ma: Late Permian.
Atlas Figure 212: Holdridge life zonation diagrams of the Late Palaeozoic in northern South America, 340 Ma: Middle Mississippian, 320 Ma: mid Carboniferous boundary, 300 Ma: Carboniferous Permian boundary, 290 Ma: Early Permian, 270 Ma: Middle Permian, 250 Ma: Late Permian
